

ACELLULAR AMNION-DERIVED ALLOGRAFT

AMNIOTIC INJECTABLE TO AID
IN JOINT SUPPORT AND PROTECTION

WHY AMNIOTIC MEMBRANE?

Human amniotic membrane constitutes the innermost layer of the placental tissue, and consists of a single layer of cuboidal epithelial cells firmly adhered to a thick basement membrane. Its benefits and properties provide a wide variety of therapeutic applications in regenerative medicine.

NATURAL

SurFactor[®] is manufactured from amniotic membrane taken from donated placental tissue

HEAVY CHAIN-HA

Research shows heavy chain-hyaluronic acid provides joint lubrication and protection

PROTECTIVE SUPPORT

A primary function of the amniotic membrane is to provide a protective support for tissue

SHELF-STABLE

SurFactor[®] is processed into an acellular injectable that no longer requires cold storage to retain its therapeutic properties

WHY SURFACTOR[®]?

Providing innovative solutions to meet the unique needs of our providers.

SurFactor[®] is produced using minimal manipulation. This process extracts the membrane from the placental tissue, leaving only the amniotic membrane layer which is then processed into an acellular injectable product. This process is a highly manual and surgical harvesting procedure regulated under Section 361 of the Public Health Service Act. SurFactor[®]'s minimally manipulated process retains beneficial components of the amniotic membrane and generates an allograft that is shelf-stable.

Product Information

Learn more about SurFactor[®]

SurFactor[®] is regulated under Section 361 of the Public Health Service Act and is intended for homologous use.

Potential SurFactor[®] Applications

- + Orthopaedics
- + Podiatry
- + Sports Medicine
- + Pain Management

What is SurFactor[®]?

SurFactor[®] is an injectable flowable amniotic membrane allograft that is derived from a donated placenta obtained via C-section delivery. It is processed to be acellular to allow for shelf-stable storage while retaining the membrane's therapeutic properties.

Potential SurFactor[®] Benefits

Heavy Chain-HA
Shelf-Stable
Protective Support
Non-Steroidal
All-Natural

Is SurFactor[®] Safe?

SurFactor[®] is thoroughly tested for safety and efficacy. We pride ourselves on safety standards that exceed regulatory requirements by performing additional serological and endotoxin tests.

Vial Sizes

SurFactor[®] comes in multiple vial sizes tailored to a variety of injection locations

* Vials shown are not to scale

Inspected for Quality

All vials are measured using a calibrated electronic pipette, and our quality team individually inspects all vials to ensure they meet our unparalleled standards.
